

TECHNICAL DATA SHEET

Declaration of no Objection

For the production of our raw papers and boards only raw and auxiliary materials, colors and brighteners are used which comply with the XXXVI. Recommendation of the Federal Institute for Risk Assessment (BfR) according to the German food law.

The raw materials used in the manufacturing process are free from heavy metals and/or heavy-metal compounds.

Papers which are in direct contact with humid or greasy food have to be bleeding safe according to DIN EN 646 and DIN EN 648.

Declarations of no objection with regard to food law have to be filed for grade specifically with a free, independent institute.

Especially for the food related sector, Gmund offers the paper collection "Gmund for Food". The papers in this collection are certified and permitted to come into contact with foodstuffs.

For customer related special productions, we offer to initiate the certification upon request.
