

DURABLES

ENDURO Ice

ENDLESS CREATIVITY

ENDURO Ice is a transparent composite material consisting of a film core enclosed between two layers of paper, for use as:

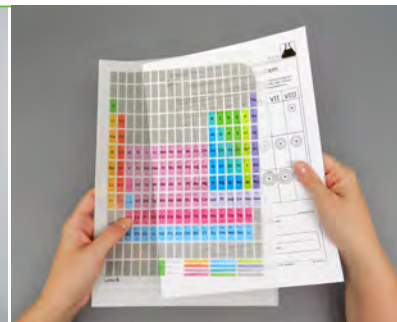

- > Calendar cover sheets – that do not become rippled
- > Book covers and banderoles – that are tear resistant
- > Insert sheets – that do not tear or protrude due to moisture
- > Transparent envelopes – that do not get tatty in the sorting plant
- > Packaging – translucent in an elegant and sophisticated design
- > Folders and sleeves – perfect functionality looks and feels good

ENDURO Ice makes solutions and printing technologies possible, where customary transparent papers show their limits.

Printing and processing recommendations can be found on the Sihl website or received upon request.

Special benefits:

- > Durable & long-lasting
- > High tear resistance
- > Outstanding folding and grooving properties
- > Dimensionally stable and wet-strength film core
- > Good printability with offset and laser
